

Company Profile

AVIATION CAPITAL EXPERTS PROVIDES FINANCING FOR EVERYTHING AVIATION

Aviation Capital Experts LLC (ACE) is the first national financing company specializing in providing financing for all aspects of the Aviation Industry. While most of our competitors focus on very narrow segments of the industry, ACE provides financing for virtually anything associated with aviation. Comprised of both pilots and bankers, ACE understands the financing needs of the entire aviation industry and has forged relationships with numerous nationwide funding sources and lenders representing a wide range of lending programs. This includes aircraft financing, from ultra-lights to jets, and everything in between including maintenance and refurbishment. We also have capital available for hangar construction, FBO business, working capital, training and hangar loans.

Pilot and banker Tammy Hand, former Aircraft Section Manager at MBNA (now Bank of America) founded ACE to serve what she identified as chronically undeserved

segments of the aviation industry. For example, while many in the industry took a wait and see attitude, ACE was one of the first to embrace the newly emerging Light Sport segment of the industry by providing conventional loan terms. In most cases, light sport pilots can attain financing on the same terms as the conventional Part 23 segment of the industry. ACE believes LSA is an important component to the continued vitality of the industry. Visit Tammy at the U.S. Sport Aviation Expo 2008, January 17-20 at Sebring Regional Airport, FL (www.sport-aviation-expo.com). ACE will have a booth and Tammy will be giving a presentation on Financing an LSA

Tammy understands the value of having pilots work with you for your financing needs. ACE is focused on finding solutions for other pilots and aviation enthusiasts. Frustrated earlier in her career with aviation lending personnel possessing no personal link

to or credentials within the industry, Tammy has insisted that all ACE lenders be active pilots. When you confer with an ACE representative, you'll deal with other PILOTS who understand YOUR needs. In many cases, you'll deal with Tammy personally. We at ACE believe that aviation is the world's most exclusive fraternity of which we are proud to be members.

Tammy holds a B.S. in Finance and graduated with honors from Missouri State University. She lives aviation, holding both single-engine land and commercial lighter than air ratings. She and her banker/pilot husband live (and Tammy works from) their residential airpark home located in New Jersey. Their Beechcraft shares a private hangar with a Cameron Hot Air Balloon.

Please visit their web site or call for more information. Tammy is always ready to talk aviation. 877-ACE-2Fly www.ace2fly.com 856-885-9458
